

Hoodies

The attached photos were emailed to me by Deputy Joshua Button (RSO/CVNTF) who received them from some of his law enforcement contacts. Josh just wanted to take the initiative and ensure our patrol and corrections folks also received the info. It comes out of the beach cities areas of LA County.

This e-mail is being circulated in law enforcement circles. If you didn't see the pictures, it might be interesting trying to understand when a victim tells you that the "hoodie" covered their entire head. See the attached photos of a hooded sweatshirt that covers the face, **but probably allows the person to see through the material.**

Check out these photos of a new sweatshirt that a store in Lakewood Mall began selling last week. Mall security officers have discovered a new article of clothing just coming out in stores. Over last Halloween there was a skeleton looking version but this one disturbs me even more. The photos attached show how the sweatshirt can be worn up to and including completely obscuring the individual's features. These hoods are being sold at Up Against the Wall for \$68.00.
